**DETAILED ACTION**

1. Claims 1-9 are pending in this application.

***Restriction/Election***

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-4 (in part), 5 and 6-11 (in part), drawn to compounds, composition and method of use where **X** in formula (I) is N, classified in class 544, subclass 236.
  - II. Claims 1-4 (in part) and 6-11 (in part), drawn to compounds, composition and method of use where **X** in formula (I) is C, classified in class 546, subclass 118.

The inventions are distinct, each from the other because of the following reasons:

Groups I-II are directed to structurally dissimilar compounds such that the variable core created by the varying definitions of **X** in formula (I) do not belong to the same recognized class of chemical compounds in the art, and references anticipating one invention, would not render obvious the others. Group I is drawn to pyridazine compound that is fused to an imidazo ring and is different from Group II that is drawn to a pyridine ring that is fused to an imidazo ring. Thus, separate searches in the literature as well as in the U.S. Patent Classification System would be required. Each group's compounds are made and used independently of each other and could support

separate patents. The compounds differ significantly in chemical structures. One skilled in the art would not consider such diverse structure equivalents of each other.

Because these inventions are distinct for the reasons given above and have acquired separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to Mr. David Dow on Oct. 19, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
